

# KruKraft Bleached

More advantages. Less footprint.

KruKraft Bleached from Kruger is the packaging paper made to leave less of an impact on the environment. Through the use of our proprietary cellulose fibre technology and integrated pulp sourcing, KruKraft Bleached provides the ability to lower basis weights and still retain similar strength properties. In short, the sustainability, consistency and lay-flat you need for a wide variety of applications.

## Applications

For bread bags, consumer and concession bags, industrial masking base, pouches, food service, lamination, extrusion base and more.

## Benefits

- Consistent quality
- High strength at lower basis weights
- Consistent lay-flat
- Exceptional print fidelity
- Outstanding converting performance
- FDA compliant for direct and indirect food contact

Basis Weight # (24 x 36 / 3000 Ream)	GSM	Brightness	Recycled Content	Fibre Certification (FSC Available)
KruKraft - Bleached

25	41	80	Available	Yes
30	49	80	Available	Yes
35	57	80	Available	Yes
40	65	80	Available	Yes
45	73	80	Available	Yes

## Why Kruger?

### Peace of Mind

With Kruger, you're getting a financially stable and diverse company with a worldwide reputation for excellence and more than a century of experience in the paper industry.

### Innovation

Kruger specialty papers are manufactured with our patented cellulose filaments to deliver improved strength, lay-flat, and consistency at lower basis weights.

### Service

From our knowledgeable sales and product development teams to our experienced and flexible customer service and manufacturing teams, our focus is on providing products that meet your needs at a price that adds value for all parties.

### Sustainability

Maintaining our legacy of responsible, sustainable practices is at the core of all our decisions. To protect our natural resources, our specialty papers are certified to internationally recognized standards.
